Business Administration 4413A/B DERIVATIVES & RISK MANAGEMENT

This course is designed for students interested in careers in investment banking, finance consulting, or corporate finance. The course covers how derivatives products are structured, priced, and used. This knowledge is essential for corporate executives who use derivatives in financing activities and risk management, bankers who create and trade these products on their behalf and on behalf of clients, and managers of mutual, pension, and hedge funds.

Business Administration 4501A/B DOING BUSINESS IN ASIA COMPETING IN AND WITH CHINA

Business Administration 4560A/B STRATEGIC HEDGING FOR INVESTORS INVESTING

This course explores ways by which the other component of risk – market risk – may be assessed and, when appropriate, hedged. Data exercises throughout the course support the practical orientation of the material covered, including exercises requiring students to construct portfolio hedges. This course explores how to assess overall stock market risk within a value investing approach, how to determine a fair value for the overall market, and what steps to take to manage exposure to market risk. The course reviews stock market manias and behavioral biases which can affect market prices.

Business Administration 4605A/B SPECIAL TOPICS IN COMPETING WITH ANALYTICS BEST PRACTICES

Many major corporations now see analytics as a source of competitive advantage. This course will attempt to familiarize you students with the best practices and methods these organizations use to harness superior analytics skills to ensure that corporate decision making supports the strategic objectives of the organization.
