PHILOSOPHY

Effective **September 1, 2013**, the following new half-courses will be introduced by the Faculty of Arts and Humanities: PHIL 2702F/G and PHIL 2703F/G. In addition, Phil 2701E will be revised to include these two half-courses as antirequisites.

Philosophy 2702F/G: Modes of Normative Reasoning I

The goal of these companion courses (Philosophy 2702F/G, 2703F/G) is to understand the nature of morality, law, and bioethics by examining the modes of reasoning they use and the conceptions of rationality implicit in them. This course considers the application of moral theories and principles to problems, case-based reasoning, and methods of interpretation.

Antirequisite: Philosophy 2701E

3 hours, 0.5 course

Philosophy 2703F/G: Modes of Normative Reasoning II

The modes of normative reasoning examined in this course are narratives, situational contextualism, and background contextualism. Because all normative reasoning turns out to require judgment, morality, law, and bioethics can be rational only if judgment can be rational. A process-based conception of rationality is presented to vindicate the rationality of judgment.

Antirequisite: Philosophy 2701E

This is a companion course to Philosophy 2702F/G.

3 hours, 0.5 course

Philosophy 2701E – Modes of Normative Reasoning

Approaches to ethical decision making will be examined to see how they can assist practical ethical reasoning and enhance our understanding of morality. Approaches to be studied include casuistry, interpretation, the construction of narratives, and the application of moral theory to real life situations.

Antirequisites: Philosophy 2702F/G, 2703F/G

3 hours, 1.0 course

Effective **September 1, 2013**, the requirements of the Diploma in Ethics be revised.
