## FACULTY OF HEALTH SCIENCES

### SCHOOL OF HEALTH STUDIES

Effective **September 1, 2015**, the following courses be introduced.

#### Health Sciences 4420 A/B - Innovation in Care Delivery

Drawing from cutting-edge research in the field, the objective of this course is to give students a clear understanding of the rationale behind the introduction of innovative care delivery approaches in acute and community settings, and the issues to consider when implementing these approaches.

Prerequisite(s): Registration in the third or fourth year in the School of Health Studies

Blended learning: 1 lecture hour and 2 hours online activity, 0.5 course.

#### Health Sciences 4705 A/B - Aging and Community Health

Focusing on innovative multi-sectorial collaborative models to support economical, optimal aging at home for older adults with multiple chronic diseases, the objective of this course is to introduce students to the concepts of active aging, consumer engagement in health, community capacity development, and the role of communities in promoting health.

Prerequisite(s): Registration in the third or fourth year in the School of Health Studies

Blended learning: 2 lecture hours and 1 hour online/experiential activity, 0.5 course

#### Health Sciences 4750 F/G - Current Health Care Issues for an Aging Population

By addressing published calls for research into health care issues related to the aging population, the objective of this course is to introduce students to some of the current gaps in knowledge or community-based services for an aging population, and to develop their ability to critically analyse both the issue and potential solutions.

Prerequisite(s): Registration in the third or fourth year in the School of Health Studies

3 lecture hours, 0.5 course
